Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 10, 16 – 25, 32 – 40 are drawn to synchronization and manipulation of data structure, classified in class 707, subclass 101.
 - II. Claims 11 –15, 26 – 31, 41 – 59 are drawn to coherency, classified in class 707, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

Inventions in group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in group I has separate utility such synchronization and manipulation of data structure. The invention in group II has separate utility coherency. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

During a telephone conversation with John Gordon on 07/19/2006 a written election restriction was requested.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Remarks

3. It is brought to the applicants notice that response period to this office action is 1 month.
